Do Your Work In a Branch

- Create a branch to do your work, e.g., "a3"

```
git checkout -b a3
```

- Do all your work

Push Branch

- Once you're done, add, commit your work

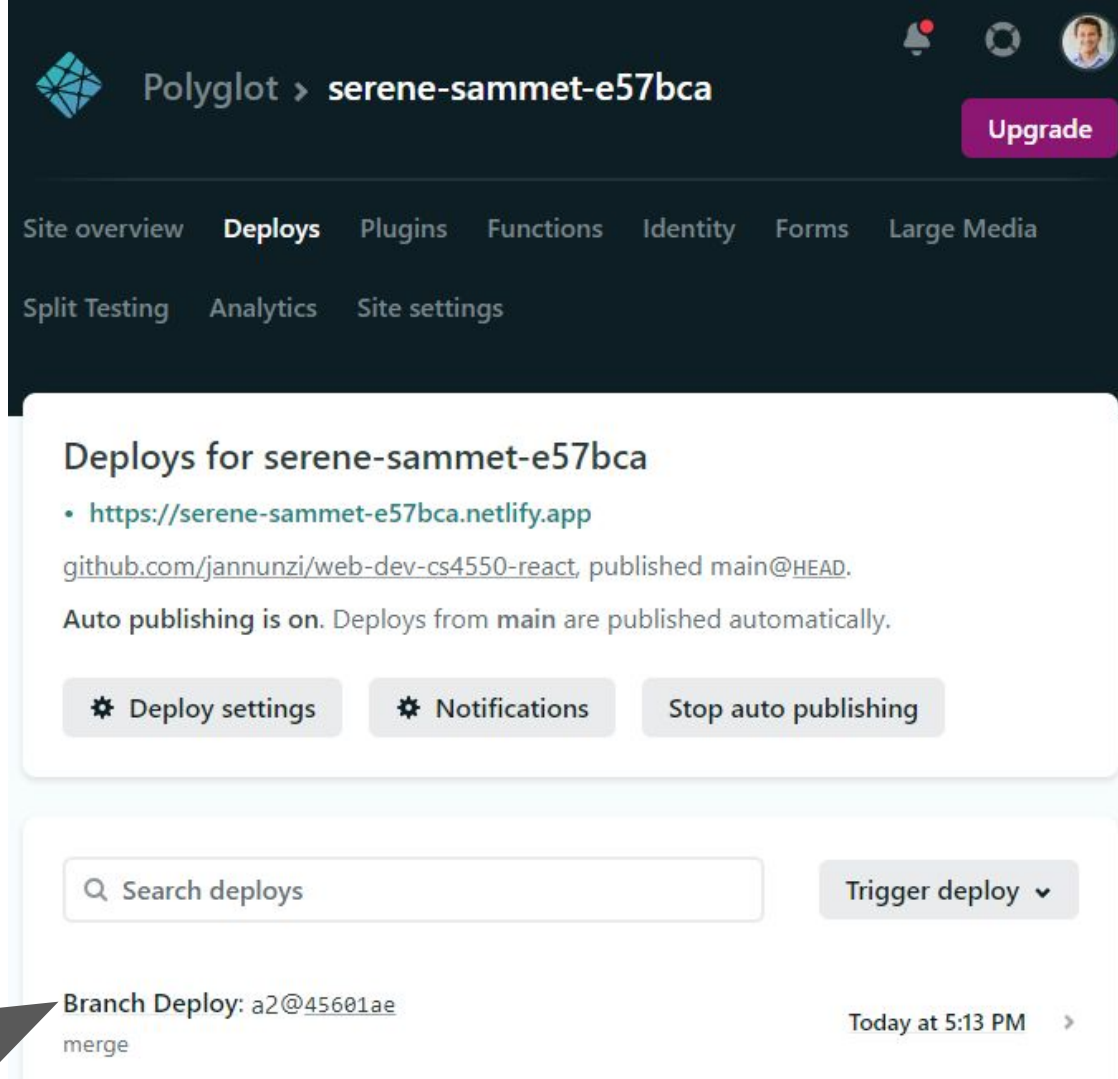

```
git add .  
git commit -am "a3 css sp22"  
git push
```

- Push your branch to the remote

```
git push --set-upstream origin a3
```

Branch Deploy

- Netlify deploys each branch to separately
- Click on Branch Deploy to access deployed branch

The screenshot shows the Netlify dashboard for the project 'serene-sammet-e57bca'. The top navigation bar includes links for Site overview, Deploys, Plugins, Functions, Identity, Forms, and Large Media. Below this, there are links for Split Testing, Analytics, and Site settings. The main content area is titled 'Deploys for serene-sammet-e57bca' and displays a list of deploys. The first deploy is a branch deploy from 'github.com/jannunzi/web-dev-cs4550-react' published from 'main@HEAD'. It includes buttons for 'Deploy settings', 'Notifications', and 'Stop auto publishing'. A search bar and a 'Trigger deploy' button are also visible. At the bottom, a specific branch deploy is highlighted with a mouse cursor pointing to it.
